

The Protector Novel Levi Garrison Chapter 1805 – 1806

Chapter 1805

“I definitely can’t show up now, the only thing I worry about is the safety of my family!”

“In this way, you send Junjun to my mother first! Others, listen to my news!”

Levi still separated from Junjun first.

After all, Junjun is in great danger following himself.

This is something he doesn’t want to see.

In the base of Shenlong Science and Technology Alliance.

Wood Zhengjie laughed wildly after hearing all the news.

“God helped me too!!!”

“Levi, you didn’t expect that there will be this day, right? The enemy of Morendam! Hahaha, God has eyes!”

...

Wood Zhengjie was extremely excited.

He clenched his fist tightly, and his eyes flew out.

The grudge between him and Levi was deep.

He would love to see Levi like this.

In addition, Levi was in this situation, and no one cared about him anymore.

A Wen Lei has no threat at all!

“I have obtained the qualification for use in Lab One! I am about to carry out my great plan in Lab One! No one can stop me!”

Wood Zhengjie’s face was crazy.

These days, he is thinking of finding an opportunity to start planning.

Although Levi no longer pays attention to him.

But Wenlei is always a hidden danger in the science and technology base.

It happened that Levi had something to do, and his opportunity came.

Now he doesn’t care about Wen Lei.

Even if Wen Lei sees his conspiracy, what about?

Without Levi, she couldn’t stop it at all.

The people in the entire base believed in themselves, Wen Lei used the lead to stop it?

Soon, Wood Zhengjie set a specific time.

Even arrange everything related to the experiment.

Immediately, the whole base was boiling.

Laboratory No. 1 is the largest laboratory. Every time it is opened, it will surely host a super large experimental project.

The main reason is that the instruments in Laboratory No. 1 and others are burning money once they are activated.

It is difficult for general experiments to afford such large expenses.

The frequency of use in Lab One is very low.

It may not be used once a year.

This time Wood Zhengjie was granted permission to use Laboratory One, which caused a sensation in the entire base.

The experiment is scheduled for tomorrow.

After Wen Lei got the news for the first time, her face changed drastically.

Her right eyelid jumped wildly.

Something will happen!

Her first instinct!

She has been observing Wood Zhengjie.

Although he has made a lot of outstanding contributions in previous experiments.

But his subsequent experiments have not yet reached the point of using Lab One.

This is obviously a problem!

His action is about to begin!

But the leaders of the base and everyone trust him!

He even thinks that he can lead the Shenlong Technology Alliance to a higher level!

“No, I have to stop him!”

Wen Lei knew that she was not strong enough by herself.

She immediately thought of Levi.

She quickly dialed Levi’s contact information.

It’s just that no one answered at all.

Only then did she browse the news on the computer that Levi became the descendant of the Heretic God.

During this time, she has been in the laboratory.

I don’t know anything about what’s happening outside.

Now that she saw the news, she was also amazed.

“It’s over, it’s over!”

Levi couldn’t count on it.

He cannot protect himself.

Now, no one can stop Wood Zhengjie.

“do my best!”

Wen Lei plucked up the courage and told her direct leader-Team Leader Xie Zhengfeng.

As a result, Xie Zhengfeng yelled at him.

“When is it, still doubting his comrades? Wood Zhengjie has changed his mind and he cannot do anything that threatens Morendam!”

“I don’t want to hear similar words again in the future!”

Xie Zhengfeng was very angry.

“But he...”

What else does Wen Lei want to say.

Xie Zhengfeng cursed: “You go quickly! Well, once Wood Zhengjie does anything, I will bear the consequences!”

Wen Lei was turned away.

She looked depressed.

“It’s going to happen!”

Chapter 1806

“What’s the matter?”

A voice sounded.

Wen Lei turned around to take a look, not knowing when Wood Zhengjie was already standing next to her.

“No...nothing...”

For some reason, Wood Zhengjie smiled like a demon at this moment.

Wen Lei felt terrified.

Wood Zhengjie kept staring at her: "By the way, Miss Wen, my great experiment will start tomorrow. Would you like to witness?"

"No, I still have things to do!"

Wen Lei quickly refused.

She felt that Wood Zhengjie was going to have something big.

"That's a shame!"

Wood Zhengjie smiled.

Seeing Wen Lei hurriedly leaving from the back, Wood Zhengjie revealed a bloodthirsty murderous intent: "I will be the first to have you at the operation tomorrow!"

On this day, the entire Shenlong Science and Technology Base is preparing for Wood Zhengjie's experiment.

I have to say that Laboratory One is the strongest laboratory.

Even Wood Zhengjie has calculated that if the experiment fails and a super explosion occurs, other laboratories are afraid that they will fall apart.

But Lab One can be completely blocked!

This is Wood Zhengjie's ideal laboratory.

His previous laboratory didn't have this intensity, which is what he dreamed of.

The other side.

Jun Jun was sent to Jiang Hai Porter's house.

The Porter family naturally also knew about this.

Jun Jun was sent here suddenly, and everyone was frightened.

“Junjun, where did your father go?”

Ollie asked.

The sensible Junjun shook his head: “Grandma, Junjun doesn’t know where Dad is.”

“What should I do next?”

Ollie knew that many people would come to her next door.

It is difficult for the Porter family to protect Junjun.

What’s more, now everyone wants to catch Levi.

Levi couldn’t catch it, or couldn’t find it.

Naturally, they would come to Levi’s family.

Such as Junjun and myself.

If you catch them, threaten Levi to show up.

Levi was the demon in their mouth again, and he had to show up when facing his mother and daughter.

“Then Junjun and I have to hide quickly?”

After Ollie thought about the stakes, she wanted to hide her right away.

“Auntie is late! I just received the news that Junjun’s appearance at Porter’s house is already known to everyone! Now a large number of Lords are coming to Porter’s house!”

Regina exclaimed.

“How can that be good?”

Ollie was anxious like an ant on a hot pot.

“Da da da...”

At this moment, black figures appeared in Porter’s manor.

They came directly to Junjun and Ollie.

Regina, the most powerful of the Porter family, stopped in front, but couldn’t even stop the opponent with a finger.

“Take people away!”

These mysterious Lords took Ollie, Regina and Jun Jun away.

It disappeared instantly without a trace.

Just the moment they left.

One after another, the Lords came.

“where is the guy?”

“What? The person has been taken away?”

“Who is it! Go, catch up!”

...

Batch after batch of Lords chased up.

Soon, news spread that the three of Junjun were taken away.

It even reached the ears of Tiance Mansion.

“What? People have been arrested? Could it be that some overseas forces have arrested people during the chaos?”

“Absolutely! This is a good opportunity for them! The talent of this kid is the best to take away. If it is killed, it will be Morendam’s loss!”

“Look, quickly send someone out to find, and you must find the child back! This order is no less than catching Levi!”

...

The news that Junjun was taken away quickly reached the ears of Logan and Mann’s family.

Sarah is going to explode.

“Garrison...what are you going to do with Levi?”

“You must send your child to mom. It’s fine now. I’ve been arrested. I won’t forgive you for the rest of my life!”

Plum dye is crying.

In times of crisis, bad luck happens one after another.

The Protector Novel Levi Garrison Chapter 1807 – 1808

Chapter 1807

Levi becomes a public enemy first!

Wood Zhengjie's terrible experiment is about to be completed!

The daughter and mother were even arrested!

When people are going downhill, all the troubles will follow.

The situation is worse than expected.

Soon, a group of black-clothed and masked Lords appeared outside Sarah's residence.

However, there has long been a Lord of Tiance Mansion guarding it.

"who are you?"

Both sides encountered.

The Lords in black ran away immediately.

The Tiance Mansion that received the news is more and more sure that there are overseas forces taking advantage of the chaos and wanting to attack Levi's family.

Levi is now the enemy of Morendam.

If overseas forces seize Levi's weakness, they can use it to coerce Levi into overseas.

This is terrible for Morendam.

Levi is already sixth in the summer list.

What's more, he is a descendant of the Heretic God, this threat is too great.

Once joining overseas, that is the real disaster for Morendam.

What's more, a large group of Cthulhu followers are gathering towards him.

If this force overlaps, it would be terrible!

“First, immediately find Levi's daughter and mother!”

“Second, you must protect Levi's other family members! No one can approach it!”

...

Tiance Mansion immediately ordered.

Sarah and others were well protected, let alone captured, it was impossible to get close.

But they never expected that this was Levi's strategy at all.

Because the person who took the three of Junjun was not someone else but Levi's dispatch.

This was exactly what Levi had planned at the beginning.

Now Levi is targeted by Morendam and even several neighboring countries.

For a long time to come, Levi will be in the stage of fleeing.

Daughters, mothers and wives, he can't bring them with him.

But their daughter was not around, and Levi was worried again.

After all, his absence, the safety of relatives cannot be guaranteed.

The other party will even use these relatives to force him to show up and force him to submit.

Levi didn't want to be passive.

So he came up with a perfect solution.

He deliberately sent Jun Jun back to Porter's house, and also let out the news, which caused concern.

I asked the secret team to arrest Mother and Jun Jun again, and he still arrested them in a fair manner.

This is seamless.

First, all Morendam knew that Junjun and his mother were arrested, but there was still no trace.

Secondly, Tiance Mansion and the others would suspect that it was the hands of overseas forces, and then they would protect the remaining Sarah and others.

In this way, the few people Levi cared about were all safe.

Levi solved the safety of his relatives with a small strategy.

Next, he can do his thing wholeheartedly.

Levi came out with this scheme.

The chain reaction caused is also big.

The followers of Cthulhu all recognized Levi as the Lord.

Now the Lord's mother and the young Lord have been arrested.

One by one was frustrated.

These evil demons began to search for the whereabouts of Jun Jun and Ollie all over Morendam.

Tiance Mansion and Morendam Martial Arts World are also actively looking for...

Also, the East Island forces are also confused.

“The person was taken away? Who is so fast? Even us didn’t react?”

They still want to catch Junjun.

“You said it shouldn’t be the war eagle country, right?”

Someone mentioned.

Who is Levi’s number one enemy?

That is the war eagle country!

A few days ago, Levi’s strength caused the war Eagle Nation to lose all of its people.

The Eagle Nation has been forbearing!

Now that this kind of opportunity appears, it is normal for them to take action.

The leaders of the East Island forces began to be dumbfounded.

“If the forces of the Eagle Nation intervene, it will be troublesome for us! I don’t want to cooperate with them!”

...

There are many chain reactions of this kind.

It seems that the whole world is going to be chaotic.

But another big event is about to happen...

Chapter 1808

That is Wood Zhengjie's experiment.

The entire Shenlong Technology Base is looking forward to it.

Wen Lei thought about it all night, but couldn't stop him.

You can only take one step and look one step at a time.

What if you guessed wrong?

Wood Zhengjie is fine...

Soon, the next day came.

Laboratory No. 1 was opened for the first time this year.

Xie Zhengfeng and other team leaders arranged everything Wood Zhengjie needed.

Especially the staffing, they all worship Wood Zhengjie without a brain.

When Wood Zhengjie entered the No. 1 laboratory, he specifically urged people to look after Wen Lei.

Wen Lei also has permission to enter Lab One, but it is on the outermost layer, and everything inside can be seen through the special glass.

Wen Lei was in a very complicated mood at this time.

Once Wood Zhengjie's experiment is harmful.

Then, she could only watch, but couldn't stop it.

Within an hour, Wood Zhengjie and the team members made all the preparations before the experiment.

This experiment is to generate super energy by the collision of super energy particles.

This kind of super-energy particle has not appeared in the world so far!

It was discovered by Wood Zhengjie during the experiment!

Once this energy is controlled, it will be great progress!

So the entire science and technology base is looking forward to it.

This is why everyone value Wood Zhengjie!

But another point is that the experiment will fail!

Once it fails, the power of this energy is too exaggerated.

If it spreads out, it can definitely destroy the entire base.

Only Lab One can stop it!

Although Wood Zhengjie's experiment has a high success rate, everyone still wears the highest level of protective clothing.

The experiment is carried out.

Super particles keep colliding and experimenting...

Time flies by minute by minute.

Seven or eight hours passed.

The experiment has been carried out thousands of times.

In fact, the previous ten experiments are laying the groundwork, and Wood Zhengjie already has a lot of data.

However, in order to improve the success rate of the experiment, Wood Zhengjie conducted more than 8,000 experiments in the first laboratory.

Now he has a bottom in his heart!

Next, the most critical time for the experiment has arrived.

I don't know why, Wen Lei's right eyelid jumped so hard.

Her heart started beating wildly, as if to fly out of her throat.

Something is going to happen!

The experiment is carried out.

Super-energy particles are about to collide.

This collision, if it fails, the power will be unimaginable.

Everyone is very nervous.

Although wearing protective clothing, it may still be unstoppable.

But when everyone was considering whether the protective clothing could block the collision of super-energy particles, Wood Zhengjie did a crazy thing.

He took off his protective clothing!

This scene caused chaos in the laboratory.

Everyone was stunned.

“He... what is he going to do???”

“Wood Wood, are you crazy? What are you doing?”

“Hurry up and put on protective clothing! You are in danger like this!”

...

Everyone shouted.

This level of particle collision, although a little energy is released, is enough to obliterate people.

So Wood Zhengjie is crazy!

“No, I know what I’m doing!”

No matter what, Wood Zhengjie walked towards the particle collider step by step.

His face was full of madness and inexplicable smile.

Although it has not officially collided, a powerful energy field has been formed.

Wood Zhengjie quickly walked into the energy field.

In an instant, the hair on his body was erected, and his hair was erected, like steel needles.

Everyone was terrified.

It is likely to be unable to withstand the energy of the energy field and be exploded into blood mist.

But Wood Zhengjie didn’t care at all!

He is like a lunatic!!!

“Did you see it? This is a genius! Crazy genius! Do the others dare?”

“applaud!!!”

Xie Zhengfeng, who saw this scene through the special glass, began to applaud.

Others also applauded.

Looking at Wood Zhengjie admiringly.

Only Wen Lei's eyelids jumped wildly...

The Protector Novel Levi Garrison Chapter 1809 – 1810

Chapter 1809

The number of super-energy particles discovered by Wood Zhengjie is limited, only eight particles.

In the previous experiment, the super-energy particles used were all imitation particles, not real ones.

The current experiment will use real super-energy particles.

“The collision begins!”

The order was issued, and various instruments in the laboratory were activated one after another.

“three!”

“two!”

“One!”

“boom!”

There was a loud bang, and everyone's ears rang out, like the end of the world.

Can't hear anything.

"Successful!"

"Successful!"

Suddenly good news came out in the laboratory.

When the particles collide successfully, they can control this energy.

"carry on!"

Wood Zhengjie gave the second instruction.

Two more particles began to collide.

The experimenters ignored the surprise and continued to start the instrument!

"The collision begins!"

"three!"

...

At the beginning of the countdown, Wood Zhengjie did something no one expected.

"Crack!"

He turned on the particle collider.

The consequences of turning on the particle collider will be devastating.

The environment of the particle collider is that when energy is generated, it can be wrapped in it.

But now it is turned on, then the energy generated after the collision will radiate...

It is equivalent to the experiment failed...

“Do not!!!”

There was a crazy look on everyone’s face!

Everyone’s eyes are about to fly out!

But it’s too late to stop!

The most important thing is Wood Zhengjie’s death?

He is right next to the instrument.

He will be the first to tear the energy generated after the collision.

Is he looking for death?

madman!

At this moment, Wen Lei and their hearts were in a sudden stop!

But what they didn’t know was that Wood Zhengjie actually had countless chips embedded in his body...

“two!”

“One!”

The particles collided!

“boom!!!”

This sound was much louder than before.

As if two planets collided.

“puff!”

“puff!”

...

Wen Lei was located on the outer layer of the laboratory. Xie Zhengfeng vomited blood in their mouths, bleeding in their ears and bleeding in their noses.

“Crack!”

“Crack!”

...

The special glass in front of them can hold the bombardment of all kinds of weapons.

But at this moment, all burst into pieces.

Can't bear the energy generated by this collision at all!

“Puff!”

“Puff!”

“Puff!”

...

The experimenters in the laboratory, the highest-level protective clothing on them, were also torn apart at this moment.

All the experimenters were covered in blood, and there were countless casualties.

Can't stop it!

This power can't be blocked at all!

The force of the collision was too great, almost destroying all the instruments in Laboratory One.

Fortunately, the strongest in Lab One still blocked this collision force and did not collapse.

Otherwise, this technology base will be razed to the ground.

Although Wen Lei was bleeding at this moment, her gaze had been fixed on Wood Zhengjie's body.

Wood Zhengjie is at the center of the collision, and he will be bombarded with the strongest energy.

In Wen Lei's eyes.

At the moment of the collision, Wood Zhengjie's clothes disappeared instantly, and his whole body became liquid.

It is so transparent that even the blood vessels and bones can be seen clearly.

Immediately, his flesh and blood disappeared instantly, and even his skeleton burst into pieces.

But before she could react, Wood Zhengjie appeared again in liquid form.

Then, he turned into a transparent red.

I can see that there is energy material flowing fast in his body...

That's right!

Wood Zhengjie uses the energy generated by the collision of particles to completely transform his physique.

Do not!

Wood Zhengjie's previous body is gone, and now his body is entirely composed of energy-matter.

It's just that he retains consciousness.

It turned out that Wood Zhengjie's real experiment was to transform his body.

Just keep consciousness, the physique is reorganized by energy!

So he is now a pure energy body!

Have super terrifying energy in the body!

The real demon is born!

Chapter 1810

Although Wen Lei had expected Wood Zhengjie to make big moves, she would never have thought of it.

Wood Zhengjie would be crazy enough to experiment with himself as a guinea pig!

Who dares to ask?

Especially the thrilling scene just now, everyone has witnessed it.

The energy after the collision directly destroyed Wood Zhengjie's body, and there was not even a scum left!

This madness is the only one in the world, right?

Reshape the body with super energy, this is hard to think of!

And the success rate is extremely low!

Failure to succeed is death!

This crazy experiment has existed in Wood Zhengjie's mind for a long time!

Before, he invented weapons like killing gods.

It controls a lot of powerful energy!

But these ultimately have to rely on foreign objects and others.

He was never strong by himself!

No matter how powerful his weapons and energy are, he is always an ordinary person!

So he wants to change!

He wants to use himself as an experiment and transform himself into a strong one.

He has thought about genetic modification, or drug modification.

Even like Jefferson, he transformed himself into a semi-robotic state.

But these can't satisfy Wood Zhengjie.

He not only wants to be the strongest, he wants to be the strongest!

So such a crazy experiment was born in his mind.

The first step: the particles collide with energy.

Step 2: Keep your consciousness.

The third step: destroy the body.

Step 4: Energy reshapes the body.

...

Wood Zhengjie prepared too much for this experiment.

Many of the most advanced technologies in the world today are used!

No matter how complicated the experiment process is, Wood Zhengjie succeeded anyway.

Now he is definitely not a human being, but a pure energy body.

Except for his own consciousness control, all parts of the body are composed of energy!

This is the terrible part of technology!

The most cutting-edge technology can indeed change everything.

Wood Zhengjie is the top group of people!

At this moment, Wood Zhengjie's body is composed of pure energy!

The whole body is surrounded by electric light, forming a terrible aura.

Most of the energy from the collision of particles was used to form Wood Zhengjie's body.

It is conceivable that how powerful is Wood Zhengjie's energy at this moment?

"I made it!!!"

Wood Zhengjie roared wildly.

This voice burst out with unprecedented energy.

"Crack!"

"Crack!"

...

All the instruments in Lab One, even indestructible, were all shattered under the bombardment of sound wave energy.

As for the experimenters who survived the sound wave bombardment, they burst into blood mist on the spot.

None of the hundreds of people survived.

It disappeared under everyone's eyes!

They all admired Wood Zhengjie before, but they all died in Wood Zhengjie's hands in the end.

Wood Zhengjie looked astonished!

How could this be?

It turned out that Wood Zhengjie couldn't control energy and body either.

So shouting casually, that's the power.

However, he set up the chip in advance to control this energy body by controlling consciousness.

After only half a minute, Wood Zhengjie was able to control his body.

I saw a push of his right hand, and terrible energy gushed from his hand.

“Crack!”

The energy directly tore the ground apart, pulling out a gully of a hundred meters long, as if it was split into two halves abruptly.

The entire laboratory was shaking vigorously, as if it was about to collapse.

Everyone was stunned!

How terrible is Wood Zhengjie?

Existence like a devil!

This group of scientists all know what a pure energy body means.

Wood Zhengjie can't be beaten to death!!!

Unless the energy body is exhausted!

But everyone understands that the energy produced by the collision of these two super-energy particles is too majestic and too great, can it be used up?

Absolutely impossible!

In this way, Wood Zhengjie is invincible!

He can't die!

The energy he possesses can destroy everything!

Even the warriors can't stop it!
