

The Protector Novel Levi Garrison Chapter 2021 – 2022

Chapter 2021

After Rex got the news, he contacted Richard as soon as possible.

One hundred billion more is a small amount for Blackwater.

The right of use has changed from permanent to five years, which is a bit difficult to accept.

So he has to ask Richard.

“Five years? Add 100 billion? Haha, this is in line with the style of the big summer people and money fans! If this thing goes too smoothly, I suspect fraud. If there are more conditions, then it is true!”

“Although five years are not long, our experts have assessed that as long as our machines are in place, we will definitely be able to mine all the sun stones within two years! Five years are more!”

Richard laughed.

“This condition is acceptable, let someone do it right away!”

“In addition, once you get the right to use these six pieces of land, send all the instruments and technicians to enter and mine immediately, the sooner the better. Now you can arrange it.

Rex nodded: “Understood!”

Richard laughed and said, “Morendam ah Morendam, for the sake of a mere 100 billion, you dare to give this to me? You really don’t know how big the loss is! Hahaha...you will regret it at that time!”

...

After receiving the promise of Rex and a subsidy of 100 billion, the four young Lords immediately signed an agreement with related personnel and the Wen family.

The literary family is also dumbfounded.

They didn't know what was going on. Suddenly the deadline was changed to five years, which was 100 billion more.

It seems that some experts who talked about cooperation helped them win it.

But why not do it?

So many benefits.

The four young Lords brought the agreement and brought them back like crazy.

Looking at the agreement, everyone at Rex was overjoyed.

It was the first time to send the news back to the Gods Laboratory.

Subsequently, Rex signed a cooperation agreement with the Big Four on behalf of the Blackwater Company.

The Four Young Lords will become the spokesperson of Heishui Company in Morendam in the future.

To put it bluntly, it is a puppet!

The Four Great Young Lords and everyone understand it in their hearts.

But countless people wanted to be this puppet, but there was no chance.

The Four Great Young Lords completely became famous in the circle, attracting the envy of countless people.

Rex was not idle.

All kinds of machinery and equipment and technicians were transported from the other side of the ocean in the first time.

The Four Great Young Lords also provide everything possible.

In less than eighteen hours, the personnel of the mining facilities in the six production areas were all ready.

Mined directly.

Speed and efficiency shocked the world!

Richard's philosophy is to mine all the sun stones in the shortest time.

Richard used video and cloud to supervise the mining site.

Rex Jimson and others directly supervised the scene. After all, it was the first time to mine, and there must be no mistakes.

"Mr. Richard, three days later, our first batch of mining is over! It is estimated that all the quantities in the six major producing areas will be more than what you sneaked into Morendam with someone before!"

Rex laughed.

Richard also smiled.

"Yes, at that time, we took advantage of our busy schedule for most of the day, and we were not as good as the one round of mining now! It will be fine in the future, and we will mine as much as we want!"

“By the way, I have sent the transport team! I will bring the Sun Stone back to me safely by then!”

Richard ordered.

“Don’t worry, it’s okay. Not to mention that no one is reacting now, even if reacting, it can’t do anything, I can only watch us shipped out!”

The corners of Rex’s mouth were full of mocking smiles.

Richard nodded: “That’s true! So far, Morendam will not know what kind of mistakes they made!”

...

At the moment, Rex and Jimson are in the Xishu region, one of the six major producing areas.

Sunstone mining is proceeding in an orderly manner.

Jimson looked around, he felt cold, and an inexplicable fear was spreading.

It seems that there are eyes looking at him in secret...

Chapter 2022

I don’t know if Levi brought too much shadow to him, or he was afraid of being beaten.

Jimson is now the shadow of a cup bow snake.

As long as there is a little bit of wind and grass, Jimson will be terrified.

It seems to be a persecuted delusion.

Now looking at the darkness around him, Jimson felt cold all over, and an uneasy feeling was exposed on his face.

Rex and others saw him strangely.

“what happened to you?”

Everyone asked.

“I feel someone is staring around! Are your safety measures in place?”

Jimson said in a panic.

“Look at it, I said you were scared by Levi. Now you can’t stand the darkness. Don’t worry, the surroundings are safe, and I will send someone to take a look!”

Rex sent someone to check around and found nothing unusual.

“Look, it’s okay!”

“You were scared by Levi! Come, protect him!”

Rex ordered.

The Lords of the Lab of the Gods followed Jimson every step of the way.

Jimson felt relieved.

But his feeling still didn’t disappear.

I always felt that someone was watching him in secret.

I have to say that this kind of sensitive person has a very accurate hunch.

Levi has indeed been in this base.

He just wanted to figure out what the sun stone was.

Before coming, he observed this area.

Comparable did not feel the strong energy fluctuations, although there are energy materials, it can not be said to be of the level of the sun stone.

has a problem!!!

Soon Levi discovered that it was an instrument in the Lab of the Gods that could actually isolate most of the energy fluctuations.

As long as this instrument is on, no one will notice strong energy fluctuations.

That's why they can mine with confidence.

Levi discovered that this is an instrument that affects the magnetic field.

Not only can it isolate energy fluctuations, it even has an impact on warriors and superpowers.

Entering this area, Levi felt that all aspects were suppressed.

It is impossible to fully display the strength.

terrible!

Is the technology of the Gods Laboratory to this level?

What's more, this is only used to isolate energy fluctuations.

If it is used exclusively as a weapon and put into battle, it is even more terrifying.

Only one instrument can suppress the martial artist!

Levi felt the horror of the Lab of the Gods.

This alone is enough to shock people.

It seems that dealing with the Gods Laboratory is still a long-term thing.

Don't worry, you have to come bit by bit.

The Lab of the Gods showed only a little bit now.

If the Lab of the Gods showed true strength, Levi would be afraid.

At this time, Levi had already sneaked into the mining site.

“boom!!!”

At this time, he already felt a strong energy fluctuation.

Too strong, too strong!

Sun Stone!!!

Levi also saw it.

It is indeed a stone.

It is just a kind of transparent crystal, which contains extremely strong energy.

If ordinary people get close, it is estimated that they will be obliterated invisibly by the energy contained in it.

Can't bear this terrible energy directly, will be squeezed into meatloaf and die.

Mining personnel are wearing protective clothing to avoid injury.

Levi really felt how terrible the Sun Stone was.

The energy contained in it is indeed rare in the world.

At present, there is no substance comparable to the sun stone.

But why has no one in the world discovered it before?

the reason is simple.

The sun stone is buried deep underground, especially deep.

Most countries cannot dig into this depth.

Technology does not support.

It is also wrapped in a thick material, and most of the energy is absorbed by the center of the earth, so as to achieve a balance, and the energy cannot be dissipated.

That's why no one has ever noticed it.

Only the Lab of the Gods can find it out.

“This...”

Levi was once again shocked by the technology of the Gods Laboratory.

The Protector Novel Levi Garrison Chapter 2023 – 2024

Chapter 2023

Mining sunstone!

It will definitely cause the loss of sun stone and the loss of energy.

If the technology is immature, this loss is extremely large.

What's more, the emission of energy may cause disaster.

However, the instruments in the Lab of the Gods actually achieved almost zero loss.

This is also terrible.

Finally, the instrument installed with the sun stone is the most terrifying, completely retaining the energy of the sun stone.

...

The Lab of the Gods is terrifying!!!

After one night, Levi had understood everything about mining.

Including the storage and transportation of sun stone.

Next, we will wait for the transportation in three days...

With Sarah's crazy efforts these days, her strength has been improved again.

She can even draw inferences from one another to unlock the potential of her body more and more. .

"The Blackwater Company has signed a contract with the four major young players. It seems that they have some conspiracy in coming to Morendam. All the leaders are here! Among them, the young owner Jimson is here!"

"I remember that Jimson passed the news about his brother on Golden Harbor Island to the Lab of the Gods, and he was also one of the murderers of his brother!"

"It's him! He is indeed a murderer!"

...

Wen Lei and Regina are discussing about the Blackwater Company.

Sarah, who had just left the customs, heard all this in his ears.

“The murderer who killed King’s Landing came to Morendam?”

Sarah asked.

Wen Lei nodded: “You can say so! Blackwater has an unshirkable responsibility! They are one!”

After speaking, Wen Lei immediately realized something.

“Sarah, calm down, don’t think about killing them! This is not the time!”

Wen Lei immediately persuaded.

Sarah nodded: “Don’t worry, I have a sense of measure.”

Her measure is not just as simple as the Blackwater Company, she wants to uproot the Lab of the Gods.

...

The past few days have been tough for anyone.

Especially for Richard and the others.

He would not be at ease if he did not see the Sun Stone.

So in the past two days, he put down everything and kept an eye on the mining situation.

In the past two days, the various forces in Morendam have been vigilant and began to inquire about what the Blackwater Company is doing.

Including Colin and Tiance Mansion and so on.

The Four Great Young Lords and their families have already understood that the Heishui Company is for the new energy sources in these production areas.

They are already mining frantically.

It's not like I said before, start cooperating with them.

not at all.

This is basically deceiving them.

But they have no complaints.

Whatever Heishui Company wants to do, it's up to them.

They are already a cooperative relationship anyway.

The name of the Blackwater Company is enough.

They responded quickly in Tiance Mansion.

It has gradually become known that the Blackwater Company is mining materials on these six plots.

I don't know what it is, but it will be exposed soon.

But it's useless to know it.

You can't get the Heishui company out, right?

...

Soon the time of three days came.

In these three days, people like Richard and Rex basically didn't even blink their eyelids.

The first sunstones mined finally recovered.

Jimson and the Big Four also stared at one place.

They are also overworked.

"Mr. Jimson, when the goods are shipped out, let's go and celebrate!"

Wang Shao suggested.

Jimson readily agreed.

This time I came to Morendam with fear and rushed on this all day long.

There is no time for leisure and entertainment.

You must relax this time.

Soon, the transport team sent by Richard has reached the six major areas.

After installing the sun stones, the transportation team will unify the six lines to everything, and then transport them back to the war eagle country by ship.

everything's ready.

The transportation team also appeared from six areas and converged to a port...

The careful Richard still sent a Lord escort!

Of course, in his opinion, no one in Morendam dared to move at all...

Chapter 2024

Even in Richard's analysis, Tiance Mansion will be escorted secretly accordingly.

After all, something happened, and they couldn't hold back their face.

Apart from other things, Morendam's reputation is also to be considered.

Richard was indeed right.

Tiance Mansion really arranged for someone to watch it in secret, and was afraid that someone would do it.

The matter is small, but the face is great.

Six transport teams from six major regions arrived at the port safely.

As Richard expected, no one stopped or snatched it.

No accidents at all!

Rex, Jimson and others specially escorted six batches of sun stones to the port.

Watching all the sun stones move onto the ship.

They all breathed a sigh of relief.

As long as you leave Morendam, you will be safe everywhere.

"Mr. Richard's mission is complete, you can just wait to accept it!"

Rex talked to Richard.

"The biggest hidden danger lies in Morendam. Once Morendam is out, who would dare to move the things in my gods' laboratory from the whole world?"

Richard laughed.

This is not just casual talk, it stems from the hegemony of the Warhawk Nation and the terrible nature of the Lab of the Gods.

The name of the person, the shadow of the tree.

Who dares to move the things in the laboratory of the gods in the world?

It's too late to hide!

That is to say, Levi and Da Xia dared to oppose the Lab of the Gods before, and the others didn't have the guts at all.

Therefore, Richard has this confidence that as long as the Sun Stone leaves Morendam, it is absolutely safe to transport it from the sea to the Eagle Nation.

No one dared to move at all.

What's more, there are many Lords on the escort.

This is safe.

"Now that Uncle Rex has completed the mission, I will celebrate with a few friends!"

Jimson said.

After the task was completed, Jimson became confident as a whole.

The shadow of Levi is getting smaller and smaller.

"Okay, no problem! The completion of the first batch of sun stones is a milestone for us and it is worth celebrating!"

Rex laughed.

...

“drop!!!”

Accompanied by the sound of the whistle, the ship slowly left the harbour and completely left the territory of Morendam.

Just when everyone thought it was stable, a voice came out: “It’s time to make a move!”

Levi had been staring at the Sun Stone.

How could Sun Stone leave Morendam easily?

Since I started in Morendam and affected my reputation, then I would do it outside Morendam.

A few hours later, the ship transporting the sun stone had arrived on the high seas.

This is also the time when everyone relaxes their vigilance the most.

In the past few hours, the Blackwater Company has issued a global announcement: “If anyone dares to touch this batch of things! Then the Blackwater Company and the Lab of the Gods will never die with him! There is even the anger of the entire Warhawk Nation!”

As soon as this announcement was made, no one dared to think about this batch of things.

Even some people, including some pirates, remove obstacles on the sea in advance to show their courtesy.

On the ship, the crew and the Lord escorts began to celebrate.

Either drinking or dancing.

There are happy and peaceful scenes everywhere.

This is their easiest mission.

It's so high-profile!

The whole world knows that they deliver things, but no one dares to grab them.

At this moment, the captain Ackles and the captain of the escort team Van der Sek were tasting the wine together.

“Before I came, I was worried that something might happen, but now it's totally unnecessary to think about it...”

Akers has encountered many robberies before.

So there is a shadow in my heart.

Van der Sek smiled and said: “Who has eaten the bear heart and leopard, dare to rob this batch of goods?”

“Yes, unless anyone wants to die, it is impossible to rob!”

“call out!”

“boom!”

...

At this moment, a flare in the front lifted off, illuminating the place as bright as day.

The Protector Novel Levi Garrison Chapter 2025 – 2026

Chapter 2025

Ackles and Van der Sek were taken aback by the movement in front of them.

“God, shouldn’t there be anyone who is not afraid of death, right?”

The two exclaimed.

“boom!”

“boom!”

...

At this time, black shadows flew out from under the sea and jumped directly onto the ship.

A small boat appeared around...

“Someone will do it! Be sure to protect it!”

Van der Sek summoned the Lords and prepared to fight.

It’s just that he just got out of the cabin, and saw a person standing on the highest point, carrying his hands on his back, like a god.

“kill!”

“No one can take Morendam’s things!”

Levi gave an order.

The killing began.

...

Originally, the Gods Laboratory didn't pay much attention to this escort, and felt that no one dared to move.

So the escorts are not very powerful.

I just met Levi.

Soon the whole army was wiped out, and no one was left.

I also borrowed these people to experience Wesley and them.

Let their strength be improved again.

“Remove all the sun stones! Remember, transport them to the place arranged in advance, and the speed must be fast, and no flaws can be exposed or left behind!”

Levi personally directs them, and Wesley is very efficient and efficient.

Everything is done within three minutes.

No one was left, and all the Sun Stones were taken away.

And the speed was so fast that these people didn't even send out the distress signal.

It is the same as they disappeared from the sea.

However, Levi didn't transport the Sun Stone to Morendam. Now the eyes of the whole world are on Morendam, but they will be exposed.

Levi always stood at the highest point, observing everything.

“In the future, if you bring a sunstone back from Morendam, I will give you your last name!”

Levi sneered and gradually disappeared into the night.

the other side.

Jimson followed the four young Lords to the nightclub Hippy, releasing all the recent pressure.

Rex was not idle either, and had dinner with the two beauties.

All worries are left behind.

They don't even want to ask about the transportation, just waiting for Richard's award.

The same is true for Richard. He carefully checked the transport ship a few hours ago.

But later he was completely relieved.

Looking at the world, no one dares to move.

Richard also went to sleep in peace.

When I wake up, the transport ship will almost arrive.

...

At this time, the major forces in Morendam, especially those headed by Tiance Mansion and Bass Guard, had gone through a long period of investigation.

Finally know about the sun stone.

Also understood all the conspiracies of Richard and the Lab of the Gods.

They aimed at Morendam for the sake of Morendam's rich sunstone.

After Levi was framed some time ago, Richard had already brought someone to take away the Sun Stone.

It's just that everything is too late!

Today, the six major areas rich in sun stones are owned by the Blackwater Company for five years.

Everything is legal and reasonable.

They can only look at mining, they can't stop...

regret!!!

It's just that their reactions are too slow!

The attention was all on Levi, and he hadn't thought about other things.

Only Levi was at the forefront of this aspect.

"If all the sun stones are mined by the Lab of the Gods, then it will be a huge threat to Morendam, and even a threat to the whole world!"

Tiance Mansion was more and more shocked.

...

No words for a night.

The next day, Richard woke up.

After washing up, Richard asked: "By the way, where did the transport ship go? According to the time, it should arrive in one hour."

"Lord, we haven't contacted, but it should be there in an hour, don't worry!"

The next person said.

Richard didn't take it seriously either.

He almost finished his breakfast, it's almost there.

An hour passed quickly.

Only the transport ship did not arrive at the designated port.

"Huh? What's the matter?"

Richard's face changed.

"Immediately contact Ackles..."

Chapter 2026

For some reason, Richard was a little flustered.

"understand!"

The people immediately contacted Akers.

It's just that there is no signal, let alone a reply.

What's more frightening is that any signal from this ship is gone.

It seems to have disappeared.

"Mr. Richard's big business is not good!!!"

"The Battle Gold has disappeared! I can't contact at all!!!"

...

As soon as the news came out, Richard and everyone were shocked.

“What? The War Gold disappeared?”

“how can that be?”

Richard looked incredible.

Could anyone really dare to touch this batch of things?

“I just checked. The Battle Gold has lost its signal since last night, but everyone didn’t treat it as the same thing and didn’t check it!”

...

“last night???”

Richard was going to explode.

I thought it was stable last night.

Where do I want this to happen.

Richard hurriedly asked, “Is there no way to get in touch with the War Gold? Is there no way to get in touch with Ackles?”

The subordinate shook his head: “I can’t get in touch, we have used all the methods we should use, we can’t get in touch at all! The War Gold really disappeared!

Richard ordered: “Check the chips on Van der Sek and them, and determine their location!”

“Okay, you need to enable permission to view this!”

“What’s new!!! The chips in the bodies of Van der Sek and others who escorted the team all failed! They were all dead! None of them survived!”

In the escort team, there are twenty powerhouses related to the Gods Lab.

Everyone has a chip implanted in their body.

Now the chips have failed.

The proof is dead.

“boom!”

Richard was shocked.

The whole person was dumbfounded.

All the Lords of the escort team died.

That means that the entire army of the Zhanjin has been wiped out...

Sun Stone is also hard to guarantee.

“Who? Who dares to oppose the Lab of the Gods?”

Richard snarled up to the sky.

He thinks that no one is doing anything in the most dangerous place in Morendam, but he thinks something has happened in the safest place.

Who?

Who the hell is it?

Don’t you ignore the announcement and force the things in the laboratory of the gods?

“Look, look for it right away! Even if the War Gold is destroyed, find it!”

Richard immediately dispatched dozens of super aircraft to find the War Gold.

About an hour later, news came.

The War Gold was discovered somewhere in the sea.

Most of the ship was damaged, and there was not a single mouth left on the ship.

All the sun stones were also robbed and disappeared.

In terms of time, it happened about seven hours ago.

“boom!!!”

Richard backed away and almost fainted to the ground.

Not to mention the huge number of sunstones mined in this batch, the key is that someone dares to move!

The loss is too great!!!

“Who? Who is it?”

“Check, check it out for me!”

“It must be found out!”

...

Richard was crazy.

“Mr. Richard, do you think Morendam made it?”

Someone asked questions.

“If Levi is alive, it must be Da Xia! But Levi is dying, it can't be Da Xia! I know them too much! They care too much about reputation, it is absolutely impossible to do this!”

“If you don't believe me, we can secretly send someone to Morendam to find it, we will never find it!”

Richard insisted.

“Then just look for it blindly now?”

Others asked.

“Well, find first, use all your strength to find!”

“Come on, connect me to Rex!”

Richard said.

...

Rex was lying on a big bed with beautiful women on both sides.

He is immersed in his dreamland.

Hearing the ringing of the phone, Rex cursed and even wanted to punch the caller.

“Who? Calling in the morning? Is it sick?”

Only a voice from the opposite side made him jump up from the bed.

“What? Lost all the sunstones?”
