

The Return of the God of War [The Protector]

Chapter 2691 - 2700

Chapter 2691

"Ten of the best! The clues I got before show that it is them! Now looking at your information, it is likely to be them!"

Mr. X sighed.

"Then they are so powerful that even the Gods' Lab can't do anything about it?"

Sombra asked.

"That's not..."

"But you all call them gods, how do you deal with them?"

Agent Black Hawk asked Levi Garrison's first question.

Mr. X glanced at him and said, "Sombra, you are a loyal partner! I can tell you!"

"The gods in Forbidden Land No. 76 are powerful! But we are not vegetarian! There is a doctor named Dark Doctor in the Lab of the Gods! No one knows in the Lab of the Gods!

He was extremely terrifying, too many people or other creatures died under his scalpel. When he encounters something he is interested in, he will catch it and start anatomy and conduct all kinds of weird experiments!

He created plans after the Lab of the Gods! His research on the human body or biology has reached the extreme!

Can transform an ordinary person's physique to the level of heaven! Lucifer and Levi Garrison died back then. He was obviously dead. It was the Dark Doctor who rescued him and brought him back to life!

Of course these are all pediatrics, his ideas and methods are not something we can figure out! "

"Speaking of which, everyone may not believe it! The Dark Doctor is the only ordinary person in the main divine division! With a scalpel, all the gods laboratory recognized the existence of a god!"

Mr. X mentioned Doctor Dark, his voice trembling and admiring.

Agent Black Hawk was shocked.

Resurrection is here!

Mr. X looked at him and said: "Tell you something you know... The weapons that Maya Industry had previously made the world helpless, the special substances on them were developed by him at will 40 years ago..."

"hiss!"

Hear here.

Agent Black Hawk sucked in a cold breath.

This is too scary, right?

You know, there are no people talking about developing effective solutions.

This is super scary.

"There are also experiments on the variant living dead of Maya Industries, all of which are simplified versions of his research! The same in pediatrics!"

Mr. X looked proud and proud.

Agent Black Hawk has already felt the horror.

“But what does this have to do with Forbidden Land No. 76?”

Agent Black Hawk asked.

“Since we learned about the existence of Forbidden Area No. 76, the Dark Doctor infiltrated Forbidden Area No. 76 alone in the early years, and he captured four gods back!”

“what???”

It was the Black Hawk agent’s turn to be surprised.

this.....

too scary!

“After he came back to his senses, he carried out various experiments such as anatomy! He studied this race so thoroughly that it couldn’t be more thorough!”

“Their pros, cons, and various characteristics are clear! Therefore, they withdrew from the God-Making Project! You know that was thirty years ago! It’s even harder to imagine now!”

“If you confront the gods of Forbidden Land No. 76 now, Doctor Dark alone will probably have dozens of ways to deal with them! Then they will all become the test subjects of Doctor Dark!”

Mr. X said.

Agent Black Hawk has been in shock.

This is also terrible.

A dark doctor will solve a powerful race.

Still called God.

"Let's put it this way, the god of Forbidden Land No. 76 still doesn't know Doctor Darkness about all aspects of his body structure! To put it bluntly, Doctor Darkness is the nemesis of this race!"

"So, no one should provoke the Dark Doctor or provoke the Lab of the Gods! If you betray you, I will hand you over to him. I guess he will transform you into a crocodile, a sheep, and be alive by wild beasts. Eat..."

After Mr. X finished speaking, the Black Hawk agent couldn't help fighting a cold war.

If it falls into the hands of the dark doctor.

Definitely more terrifying than what Mr. X said.

The point is that he is now a traitor.

So I became more and more afraid.

Mr. X saw his fear and patted him on the shoulder: "Don't be afraid! The Lab of the Gods is stronger than anyone imagined! What's more, he just entered the main division of the gods!"

"I won't ask, the more you know, the worse!"

"I don't know what plan I need to help next?"

The Black Hawk agent hurriedly changed the subject and proceeded to the second question Levi Garrison wanted to ask.

Chapter 2692

Mr. X nodded admiringly: "Smart man!"

"But there are plans for the next step! And time is running out! It's estimated to be less than three months!"

Upon hearing this, Agent Black Hawk's expression changed slightly.

Levi Garrison really got it right.

They really have big plans!

“Do you need my help? If you don’t need it, I won’t ask more!”

The Black Hawk agent has been holding his feet.

“Of course! I need you to open all energy power stations to me...”

Mr. X said this.

Agent Black Hawk’s face changed drastically.

This thing is a bit exaggerated.

“Don’t worry, I won’t make any movement! Just borrow the location of the energy power station!”

Seeing Agent Black Hawk still frowning, Mr. X continued: “Don’t use it for other purposes, just hide something!”

The Black Hawk agent’s brain is running fast, and he wants to know what the Gods Lab can hide in the energy plant.

“Okay, you can tell me when the time comes! I still have this privilege! You can arrange what you want to hide without knowing it!”

Agent Black Hawk agreed.

Mr. X smiled and said, “I hope that no one else in the Sky Shield will know, after all, you know too much now! These are all secrets in secrets!”

If you dare to leak out, then the person who came to you is Doctor Dark! I don’t need to describe him too much, right? “

“I understand this! I’m afraid of death!”

Agent Black Hawk calmly.

“Okay, I like to deal with smart people!”

Mr. X is very satisfied.

It is precisely because the Black Hawk agent is calm and afraid of death.

So they don't have any doubts.

Agent Black Hawk returned smoothly.

Lucifer the Great Clown and others, all appeared.

“Now it's basically certain that it is the group of guys in Forbidden Land No. 76...”

Mr. X nodded: “Well, that's wrong. Next, you only need to determine the list of all the gods in the forbidden area No. 76! The current known is the top three of the gods!”

“As long as you are sure, you can let the Dark Doctor take action and destroy them one by one!”

But soon he changed his words: “Unfortunately, what is the relationship between the God of Forbidden Land No. 76 and Da Xia, we still don't know what it is!”

“Maybe someone can...”

The clown emperor reminded.

Mr. X's eyes lit up fiercely: “You are talking about the great apprentice of the Dark God!”

“Yes, now we all know who the Dark Gods are, and he doesn't need to continue investigating. You only need to know from the God Commander Tiance, what is the relationship between Daxia and Forbidden Land No. 76...”

Said the clown emperor.

“Yes! Contact him quickly! As long as we resolve this doubt, we can deal with the group of guys in Forbidden Land No. 76!”

Mr. X said.

Lucifer exclaimed: “Three months, it should be almost the end! Doctor Darkness is needed to speed up the experiment!”

Mentioning this, Mr. X smiled mysteriously.

“Don’t worry about this! Doctor Dark is beyond everyone’s expectations! The plan may have to be carried out in advance, shortened to two months!”

The others were surprised: “What? Shortened to two months?”

“Well, that’s wrong! As soon as I heard that the plan was to be implemented, Doctor Dark was full of enthusiasm and directly advanced the time! Two months is a definite time, and it may be advanced. One and a half months is possible!”

Mr. X was inhaling as he spoke.

Chapter 2693

Obviously, the Dark Doctor’s ability made the laboratories of the gods and even the main brain organization, the main divine division, feel scared.

The strongest ordinary person in the Lab of the Gods!

“Remember the blood ancestors that were dug up?”

Mr. X turned around and said.

The clown nodded: “I know, I dug it out myself!”

“What’s wrong? Has something happened to the blood ancestor?”

Everyone looked at Mr. X in confusion.

The clown is the most curious.

They dug up the blood ancestors.

It's just that the blood ancestor opened up a new era, causing chaos everywhere.

Other than that, it seems to be of no use.

The presence is not great.

They haven't paid much attention to it.

Now why did Mr. X suddenly mention the blood ancestor?

"Actually, it was Doctor Dark's idea to dig out the bleeding ancestor!"

Mr. X's words made everyone breathe.

Doctor Dark?

Doesn't it mean that Doctor Dark is studying the blood race?

Dark doctor's style, when you see a strange race, you will be caught for anatomy and research.

None of them will be let go.

Now it seems that the blood race has suffered...

When encountering the dark doctor, he can only be caught with his hands.

"Yes, that's wrong! In fact, these blood ancestors were dug up, on the one hand, it is to create chaos and open up a new era. The most important aspect is that Doctor Dark wants to experiment with this race!"

"You don't know much! In addition to the blood ancestors of these later generations, he has also captured the blood ancestors of the earlier generations! He has conducted long-term research on the blood of this race and other secrets!"

Listening to what Mr. X said, everyone was amazed.

"Wrong! The blood race has too many secrets! If you study it clearly, it may not be much worse than the group of gods in Forbidden Land No. 76!"

"Yes, it would be unimaginable to master the secrets of the blood clan for us to use!"

...

Seeing everyone discussing, Mr. X couldn't help but smile.

"He Zhixue clan, and several powerful races have also been studied by him. It is said that these races have been thoroughly studied by him now!"

"The most terrifying thing is the results that Doctor Dark will research, that is, the secret traits of these races, which will be used in our planned experiments!"

"It's his master plan-the super race plan, including the creation of super humans, super creatures, etc.!"

Hear the words.

Everyone was shaking.

"Such a fast speed has been studied clearly? Can it be used in the new plan? Don't those Big Macs have to be more powerful?"

"Think about it, the trait of the blood race is used on the Big Mac. Isn't that a sweep?"

Everyone is shocked.

"Listen to Doctor Dark, there should be no weakness at the moment! Maybe it's too big to be the only weakness!"

At first it sounds a bit funny.

Being too big, how could it be a weakness?

But it is indeed a weakness.

If someone predicts in advance and builds huge tall buildings, they can keep these giants out.

Due to their size limitations, they can't get over much taller than themselves.

The Dark Doctor can't avoid this.

Chapter 2694

These giants are too big and require terrifying energy.

If you support them to leap, you can't imagine how much more energy will be added.

Their energy resources are not enough.

After all, the Lab of the Gods is now hiding in hiding, secretly conducting experiments.

It can't be swaggered.

Therefore, the Lab of the Gods is now very short of resources.

Otherwise, you can't send people to the forbidden area No. 76 over and over again.

In fact, it is the resources of the Forbidden Land No. 76...

"Doctor Dark is really scary, can this work?"

Everyone was shocked.

I remembered that Doctor Dark had said-he wanted to make each of the Gods' Laboratories a god-like existence.

No one would think this is a joke.

He is so good.

"Well, the Dark Doctor's planned experiments are relatively advanced! So our March plan was directly mentioned for two months! It can even be premised!"

"All of you are ready to prepare too! Say hello to the Black Hawk, and then we will quietly hand over, and then hide everything in the energy plant..."

With an order from Mr. X, everyone went to prepare.

On the other side, Black Hawk approached Levi Garrison.

Doctor Dark? So scary?"

After Levi Garrison listened, he exclaimed.

It seemed that he was contending with people like Lucifer.

It was actually fighting against Mr. X and Doctor Dark.

Lucifer was saved by him?

All experimental plans are him!

so horrible!

Even the god of Forbidden Land No. 76 has studied it clearly and has directly become a natural enemy.

"The only ordinary person in the main divine division?"

Levi Garrison touched his chin.

Fortunately, there is no such thing as taking the Lab of the Gods lightly.

This opponent is very strong.

The strength is that Levi Garrison doesn't know their configuration.

For example, how many strong players are, how strong are they, and what cards are there...

None are clear.

However, relying on this god to deal with the forbidden area No. 76 is not enough to be afraid of.

If the Lab of the Gods could easily kill the gods in Forbidden Land No. 76, it would be a big threat to Levi Garrison.

However, if you rely on the Dark Doctor's method to deal with it, it is really not a fear.

"The second thing-they really have to plan! I don't know the specifics, and he can't tell me!"

"But he is asking me for one thing-I need to open up all the energy power plants in the Eagle Nation!"

"As we all know, the energy power plant bases of the Eagle Nation are the most in the world!"

Agent Black Hawk's words came out.

Levi Garrison looked shocked: "So, what does he want this to do with his plan?"

Agent Black Hawk touched his chin. "He said he wanted to hide something...I also don't understand a little bit. What is hidden requires an energy power plant?"

Levi Garrison was happy: "I need to open up all the energy power plants in the War Eagle Nation, or is it just hiding something?"

"Now it seems that he either hides a lot of things, or hides something super large!"

Agent Black Hawk agreed and nodded fiercely.

In this case, it was very similar to what Levi Garrison had guessed.

It's a super big Big Mac.

Levi Garrison continued to analyze: "Why hide under the energy power plant? What are the characteristics of energy power plants?"

Agent Black Hawk said: "Since it is an energy power plant, it has huge energy, large fluctuations, and close living.

Chapter 2695

The electromagnetic anomaly produced is obviously different from other places. "

Levi Garrison nodded: "In this case, I hide the items with huge energy and electromagnetic abnormality in the energy plant, do they overlap and no one can see it?"

"Yes, at best, the electromagnetic and energy fluctuations are more severe. Others are not abnormal at all. Electromagnetic energy fluctuations are normal at the base station of energy power plants. It is not surprising that it is strong or weak!"

"No one will pay more attention or find anything, because this place is inherently abnormal! There are too many of these things, they are the same! Even if you use professional equipment to detect, the frequency will not change!"

"Moreover, energy power plants are built in sparsely populated places, even under the sea, or under the ice sheet! It's even more likely to be noticed!"

...

After listening to the analysis, Levi Garrison exclaimed: "It's amazing! I actually thought of hiding these giants under the energy power station! So that the energy and electromagnetic

and various frequencies of both sides overlap, no one can find it, let alone Everyone didn't know it! This way, it can be well hidden!

When the time comes, these giants will appear in every corner of the world silently, making people caught off guard. It was a disaster at that time! “

Agent Black Hawk also understood all this.

She was in a cold sweat.

The Lab of the Gods was really terrifying.

Everything is under their control.

“Then I bet right!!!”

Levi Garrison exclaimed.

Now that the bet is right, preventive measures must be started next.

It's a little easier.

At least the first step is right.

And there is so much information.

There are many preventive measures.

However, Levi Garrison came forward directly to behead these giants, even if he had this strength.

This measure is the most inferior.

It is the most unusable!

It is absolutely impossible for him to kill and kill these giants silently.

As long as he kills, he will definitely expose himself.

In the beginning, Levi Garrison wanted to use it to deal with the true core of the Gods Laboratory, Mr. X, they didn't even use it.

He had to do it when he was dealing with the chief priest.

If it is exposed at this time, it will fall short of success.

If Levi Garrison's plan does not include himself.

Unless it is a last resort, he will never expose himself.

So he has to prevent to solve this disaster.

First, at least know that these giants are going to hide there, and then arrange for these energy power stations.

Know where they are, understand them first, and then take action.

If they can be destroyed, they will be destroyed as much as possible. If they can't be destroyed, they will be destroyed, trapping them all in place.

Without destruction, there is no disaster.

This move is very difficult.

You have to guard against both sides.

First, this is the territory of the War Eagle Nation, and it is also a secret place. It is easy for the war eagle nation to find out.

Second, the Lab of the Gods is so powerful and cautious that you can't deal with them in a sloppy manner. It is easy to be discovered, and then all previous efforts will be abandoned.

Second, build fortifications in advance and deploy targeted defenses against these giants.

For example, build unattainable buildings to keep these giants out.

Chapter 2696

The best way is to build such tall buildings on land, blocking the Big Macs, and letting their range of activities only be at sea.

This move is more difficult.

Move the whole body by pulling a hair.

Once you want to use it.

Too much manpower and material resources are needed...

The cost and effort is unimaginable!

Don't talk about the whole world.

Just Daxia.

If you want Daxia to avoid danger, you have to build a towering city wall on Daxia's vast border to block the Big Mac.

It's the entire border!

The land in Daxia is vast, too big and too big.

The border is too long and too long.

If towering city walls were built around it, it would be an unimaginable investment.

The materials used to construct the city walls have to be completed by the whole nation!

Not even enough!

After all, today's city walls are not those that can be easily completed like stones, but need to be hard enough to withstand majestic attacks.

Then the material needed should be top metal or top material.

It must be the rarest resource.

If you use such materials to construct the city wall, you really need to unite the whole Daxia.

Almost this top-level material has to be hollowed out, or even excavated or purchased abroad, in order to meet the demand.

The power of the whole country is not necessarily enough.

It's hard and hard.

Secondly, the construction of defensive walls requires a lot of mechanical manpower.

This need is also super super big.

Every aspect of demand is like a bottomless pit.

Only when you have been madly invested can you have a chance.

Another point is time.

If a defensive city wall is built around Daxia Land in more than ten years or seven or eight years, fortunately, it can be completed with a little hurry.

But now there is only less than three months.

And if you want to finish it before, then you only have two months.

In two months, all aspects of the cost will be greatly increased.

Resources, manpower, technology, etc. will increase by tens of times, hundreds of times!

It really needs the power of the whole country to do it!

The critical time is too short.

This is impossible!

Things that the entire nation cannot possibly accomplish.

If Levi Garrison proposes now, how many people will do it?

Who can afford this kind of risk?

Let alone whether I believe Levi Garrison's prediction is coming.

Just believe it.

To build defensive walls.

It takes the power of the whole country to build it. Who will start this?

If it succeeds in the end, you are the hero who sings for a thousand years!

But if you fail, you will be a sinner through the ages!

No one is willing to take this risk!

The real one affects the whole body.

Once this matter starts, there is no way to go back, all have to be invested.

Chapter 2697

There is no turning back.

Started to give up and will become a sinner.

Giving up halfway is still a sinner.

It is still a sinner if it is not completed in the prescribed time.

If it is constructed, the result is not defensive, and it is still a sinner.

If it is constructed, there will be no expected thing to happen at all, the biggest sinner.

Want to criticize everybody.

Even death can't offset everyone's hatred.

...

This is something that must be successful and must come in handy!

The price is too great!

Let me put it this way.

If Daxia really builds the defensive model that Levi Garrison envisioned.

Then, all walks of life in Daxia will stop everything.

Don't think about development in a country.

All the power is put into this, it is possible to complete the construction in two months.

It is equivalent to everyone in Daxia doing nothing for the next two months.

Accompany you to build this.

It also means that it is very difficult.

First you have to convince them!

Convince thousands of people to be with you.

As for how to avoid the sight of the Lab of the Gods, this point does not need to be considered.

It is not so obvious that the city wall is built directly.

You can divert your attention and build others.

Even building walls underground and using devices.

When disaster strikes, the city wall will rise from the ground, just towering high on the ground.

Compared with the power of the whole country to build a city wall, this is not a problem.

Even if the Lab of the Gods guessed it, it is impossible not to plan.

Two months are too short, and it is estimated that they will not be able to react.

There is no reaction time, all this is fine.

“call!”

Levi Garrison took a long breath.

What should I do at this juncture?

Dry!!!

Anyway, he must be the one who is most at risk!

The next step is to persuade Daxia's prestigious people to agree to this matter and start mobilizing everyone to start action.

time is too short.

It must be done right away.

Even if it is vague information.

After waiting for the exact information, it is estimated that more than a month has passed.

There was really no chance at that time.

So we must speed up!

“Next, you continue to contact the Lab of the Gods, if you have any information, come to me!”

Levi Garrison left the war eagle country.

Go to Daxia.

Agent Black Hawk looked at Levi Garrison’s back, lost in thought, and the expression on his face was thought-provoking.

He did not return to Kunlun College.

After all, Tiance Superintendent and Tiance Mansion are different in nature.

There is little chance that they will come in handy.

Levi Garrison came to Yanlongwei.

Found a former principal-Hong Qingcang!

Yan Longwei didn’t know Levi Garrison’s strength right now, just like everyone else.

After all, in this new era, Levi Garrison had very few dealings with them.

Not even there!

It’s just that Levi Garrison listed the title of king side by side.

Chapter 2698

“A word side by side, you came in such a hurry? Did something happen?”

Hong Qingcang and several high-level officials gathered around.

“Listen to me! One hundred thousand in a hurry!”

“If you believe me, immediately do what I say...”

Levi Garrison hurriedly said the plan again.

“What? The whole nation will build a defensive wall! At least three hundred meters high???”

“What are you doing???”

“Are you kidding me?”

“It is at least three hundred meters, if conditions permit, four to five hundred meters is best!”

Levi Garrison said with a serious face.

According to the analysis of the data he obtained from Maya Industry, in the plan of the Dark Doctor of the Gods Laboratory, the height of these giants was sixty meters.

But this was the plan three or four years ago.

If it is now, Levi Garrison predicts that it is definitely seventy to eighty meters.

It is even possible to hit 100 meters.

He has always been cautious. In order to ensure defense, he directly set the height of the Big Mac at about 150 meters.

In this way, even if Doctor Dark’s plan is advanced, one hundred and fifty meters is definitely the limit.

It will never exceed this height.

Therefore, Levi Garrison had to set twice the height to build the defensive city wall.

Only in this way can the Big Mac be stopped.

If you are sure to be foolproof, a height of four to five hundred meters is the best.

But it will cost more.

The difficulty directly increases many times.

“King of the word side by side, don’t be joking! I have a vast area in Daxia. What a huge amount of work it is to cast a circle of protective walls around it! Unheard of! First in the ages, right?”

“The key is to use new materials and to cast a height of 300 meters!”

“The most terrifying thing is two months! How is this possible?”

Hong Qingcang exclaimed again and again, saying that it was impossible.

“Yeah! Such a large amount of work! Everyone in the Dragon Kingdom puts down everything they have on hand and builds the city wall for the protection of the country, so there is a glimmer of hope for completion, right?”

“Isn’t it? At that time, the various industries of the Dragon Kingdom will stop operating, and all the people will put aside the things and lives at hand, and join them! The entire Dragon Kingdom is paralyzed! Remember! It is the true Dragon Kingdom!”

“This move is too big! There is no such move in the past, I have never seen it before! The power of the whole country to do one thing is unheard of!”

...

The other senior Yanlongwei also exclaimed.

This thing is too big.

They were almost scared to death when they heard it.

Let alone execute it!

Even a few years ago, the dominance of the alliance besieged Daxia, the national disaster was not as important as it is now.

That is a piece of cake.

It's not worth mentioning at all.

"It is precisely because I have thought about it, so I came to you! Only you can call on all the power of Daxia to do this!"

"In three months, the whole world will face disasters! I may not be able to take care of other people! But I have to protect Daxia! Otherwise, after three months, disasters will come and Daxia will be devastated!"

Chapter 2699

"At that time, the Lab of the Gods came in full swing, and there will be no one to stop! Now is our only opportunity! We must prevent it in advance!"

"There is not much time left for us! Two months must be completed! Steps must also be completed! This is the only hope to save Daxia!"

Levi Garrison insisted.

At this time, another person, Xiao Liejun, stood up.

He and Hong Qingcang had two more, they were the four chiefs of Yanlongwei.

"One word side by side, don't get excited! Let me ask you a few questions!"

Xiao Liejun said.

"Okay, ask!"

"First, why do you insist on building a national defense wall with all the power of the country?"

"Because disaster is coming soon!"

“Can you tell us what kind of disasters you need to work so hard to mobilize, and the power of the whole country?”

Seeing everyone watching.

Levi Garrison can only tell the truth: “Because the Lab of the Gods still exists! It’s...”

Levi Garrison wanted to say right under his feet, right under Yan Longwei’s eyes.

But he was afraid that after speaking out, someone couldn’t help but inquire patiently.

This will happen instead.

And I can’t say too much.

What if the wall has ears?

Yan Longwei must be a traitor, but what about the people below?

“Maya Industry is their guise. They are about to create a giant with a height of hundreds of meters, and there will be no one to stop by then!”

“It is estimated that the plan of the Lab of the Gods is to use these giants to invade every place. At that time, it will be too late!”

“Not only that! The laboratories of the gods will also appear! They are even more powerful than you can imagine! At that time, it will definitely be a real disaster!”

Levi Garrison said excitedly.

Xiao Liejun smiled and said, “The word side by side king is a bit alarmist, isn’t it? A giant with a height of 100 meters? We also have it!”

“Yes! Wrong! Our scientific research team has long developed a hundred-meter fighter machine! Kunlun Industry and Wenjia have developed a robot war beast that is 100 meters high! The tallest one is 150 meters long. !”

“These Big Macs are powerful! But there are still some shortcomings! It’s terrifying, but it’s definitely not a disaster! It’s even more impossible to let the power of the entire country build the wall of the country!”

Another leader, Jiang Ye, also said: “Moreover, according to many sources of information, the Lab of the Gods has been destroyed! They can’t exist! One word side by side, you are a conspiracy theory!”

“I heard that you don’t practice anymore, do you specialize in these conspiracy theories?”

Everyone chuckled.

“How can the Lab of the Gods be destroyed as easily as you think! And their Big Mac is absolutely different from what you think! It can’t be dealt with at all, it can be a disaster!”

Levi Garrison said helplessly.

Think about it and know, how could the Lab of the Gods disappear?

It’s under your feet!

“Okay, be quiet first! I’ll ask him questions!”

Xiao Liejun looked at Levi Garrison: “The second question-how did you know that the Lab of the Gods did not disappear? And know about the Big Mac? Is there any substantive evidence?”

Others also watched.

“I have met the people in the Lab of the Gods, and have heard the plan from them! Some informants have learned about it... It is roughly concluded that this disaster will come in three months!”

Chapter 2700

Levi Garrison never dared to say more.

Since the Lab of the Gods can set up the base under the feet of Yanlongwei.

It is not difficult to insert some eyeliner spies in Yanlongwei.

Even they can control some of Yanlongwei's people and use them for them.

Therefore, Levi Garrison can only say something general.

This is still only in the presence of high-level officials.

"So to put it bluntly! You still have no substantive evidence! Especially for this disaster, you are more guessing, just hearing the plan is determined?"

Xiao Liejun questioned Levi Garrison with reason and evidence.

"Yeah, if it were only like this! We would never believe it! Let alone do such absurd things!"

"Presumably, the king of the word side by side also knows what it means once it is started. It is because of your guesses that you will do it with all the power of the country. Do you think it is possible?"

Others also said.

"In a word, believe me once! When did I miss it before? Everything I did was right?"

Levi Garrison said.

Everyone looked at each other.

In the past, Levi Garrison was Daxia's savior, saving Daxia from fire and water again and again.

He never missed it.

But this time...

It's really too big.

The power of the whole country!

All Daxia must stop and do something that Levi Garrison guessed!

The risk is too great.

And once it started, there were too many problems.

It's easy to fall into a dead end.

It is possible to ruin Daxia.

Who dares to take this risk?

And so far, it seems absurd!

It's all Levi Garrison's words...

Plus Levi Garrison's various actions in the past three years.

It can be concluded that he is very unreliable recently.

Without strong support, his whole person has changed.

He doesn't even listen to his wife and brothers...

Suddenly ran over now, telling them to activate the power of the whole country to build the city wall in two months.

There will be disaster in three months...

The Lab of the Gods still exists...

...

Everything sounds so absurd.

It's like a whimsical child.

how?

Do you have the ability to predict the future?

Or come back from the future through rebirth?

neither!

Levi Garrison didn't even have any evidence!

Everyone looked at Levi Garrison and was silent...

Xiao Liejun squirmed his throat and pursed his lips and said, "I believe you very much! Even this time, I still believe what you said! After all, you have always had a keen eye and an instinct to be one step ahead!

But it's a big deal, if you want to implement it! I must see substantive evidence to prove that everything you say is true! Be accurate! Instead of guessing! Even if the guess is correct!
