

# Alpha's Regret-My Luna Has A Son chapter 106

Chapter 106 Valen POV Doc laughs at Valarian , who excitedly bounces the balls of his feet as the doctor points to the two beating sacs . Yet I couldn't sit still . This was too much information to process . I expected one . Was it hot in here ? I tug at my tie , and Everly reaches for my hand when I stand up . I was overheating . Doc falls silent again . He squirts more jelly on her belly , turning the screen away for a second , he clears his throat , and tugs on the collar of his shirt .

I stop my pacing and notice him becoming a little nervous as he moves the device . Valarian was babbling happily about the twin brothers he thinks he will have . His nervousness had me uncomfortable . Why did he turn the screen away ? Doc , is everything alright ? " I asked , now suddenly frightened something was wrong with my twins I wasn't expecting . " Maybe you should take a seat , Alpha , " Doc says , and I froze . Something was wrong . I glance at Everly , and her fear is just as bad . Everly leans up on her elbows to look at Doc . " Take a seat , " Doc says F > \$\$ 5 [ \* 4 he motions toward the chair .

Yet now he had me panicking . I didn't necessarily want twins , but the thought of something being wrong with them made my heart race faster and my stomach dropped . I shake my head . " Just spit it out , Doc , " I snap , becoming annoyed . " It appears I was wrong about there being twins . " I clutch my hair and let out a breath . " Oh , thank the goddess , " I sighed . " It's not twins ? " Valarian asks , pouting . " No , I found another heartbeat ! " I nod along at his words : Thank god I wasn't looking forward to never sleeping again . " What ! " Everly shrieks , " but I saw two sacs . " Doc holds his hands out in an apologetic gesture . I know she was outraged , but this was a good thing , I planned for one . " I was wrong ; I found another so you're having triplets , " Doc and I blink . I says , must have heard that wrong .

" Triplets , " I murmur , looking at Doc and he turns the screen . " Yep , Everly is five weeks along and baby A , B , and this one Baby C was hiding behind the other . I thought it was a shadow . " Doc says while pointing at the screen , My vision tunneled and his words faded away along with the room . I fainted ! My head pounded as I opened my eyes to Everly's worried face hovering above me . She taps my face with her hand before sighing . " Thank

god , and why are you fainting ? You don't have to carry them ? " she laughs . " Please tell me that was a dream . Are we having a litter ? " I mumble incoherently .

" Ah , no , there are definitely three . We finished the scan while you were ah ... napping , " Everly says , holding up the scan . I snatch it off her and peer up at it . " I will give you both a moment , " Doc says , leaving the room . " We are having triplets ! " I repeat , trying to wrap my head around that information . I had some super sperm . I should be selling that shit ! This was a damn nightmare , and she was getting her damn tubes tied afterward . " Valen ? " Everly says , staring at me . worriedly . Man , how embarrassing ? " You didn't tell anyone I fainted , did you ? Everly presses her lips in a line and shakes her head .

" Nope , " she says , but I could feel her lie . " Who did you tell ? " " Marcus , you were out for about ten minutes . I thought I was going to have to carry you back to the car , " she says and I huff . Great , he would never let me live it down . " Did you tell him why ? " " No , Doc said it was too early . Best not to announce it until I hit 12 weeks . " That makes sense , but I knew Valarian would blab to the girls . His excitement was kind of annoying , yet also contagious . I look at the small scan in my hand before getting to my feet . " Give me your keys . I

am driving , " Everly says , holding her hands out for them . I reluctantly give them to her before following her out to the car . Triplets . What the heck was I going to do with triplets ? I pictured one baby , and I ended up with a damn litter ! Well , almost . My head was spinning the entire way home . Valarian was chatting away happily about his baby brothers . Please , Moon Goddess , be boys . He would be on the warpath otherwise . Valarian was already picking out names and they haven't even got a brain yet ! Literally , a heartbeat , and that is it . She was only five weeks pregnant , so we still had 35 weeks left . " Are you alright ? " Everly asks me . I swallowed . Mentally , I prepared myself for one , but now there would be three .

Three ! " Yep , fine , " I tell her , a little embarrassed that I fainted on her . Thankfully , the drive home was uneventful , but I had so much to do tomorrow . Marcus and I were going to visit Nixon tomorrow . Everly told me her plans over dinner . She was meeting with her father's accountant and checking over some business accounts , both us were going to busy . I had just put Valarian to bed when I heard Everly curse from the living room . Walking out , she turned the news up , What is it ? " I ask , but she holds a finger to her lips when I see Nixon was in some sort of conference meeting with one of the news channels . I move toward the couch and sit beside her . She turns it up a little more . So this is why Nixon didn't want to meet today .

He was doing damage control . I growl as I watch him give some sob story , which I knew was a lie . My father told me the real story . He handed himself in , knowing we were onto him . He tells the news reporter he was trying to find a cure for his sick daughter , leaving out the part he abandoned her to her mother . Instead , claiming she had been sick all her life , and he was trying to find a cure , that he had top leading scientists working on a vaccine . He knew we were going to uncover everything , and we blew our chance . He painted himself a saint , so when this came out , he already had an explanation .

He made it look like Leah , his mate , " dumped her kids on him , including a sick baby , before running off with another man . " What is he doing ? He is admitting everything ? " Everly exclaims . " Damage control . He knew he was about to be busted . Nixon covered his tracks and got those in the city on the side . " We listen a little more and it was clear to me this was his way of covering up . He then says he tried to offer me the Vaccine for Emily and Ben , but I refused .

He was trying to save his reputation while destroying mine . Everly's phone starts ringing , and so does mine . Pulling it out of my pocket , I see it is Marcus calling . I quickly answer it . " Are you seeing the news ? Nixon is being broadcasted across every station , " Marcus tells me . " Yep , I am watching it now , " I tell him and I hear Everly on her phone talking to someone . It only takes me a moment before I realize it is her father .

" " " Dad , slow down , let me think . You need to calm down . I will think of something , " I hear Everly tell him when the Mind – link also opens up , and my father's voice rushes through my head before utter chaos ensues when every pack member suddenly starts trying to alert us through the pack link . Everly screams , clutching her head , and my head spins as voices flit through the open link . Dropping my phone , I race to her before booming through the link .

" Don't use the mind link . We are aware ! " I order my pack before shoving them . They would give one of us an aneurysm . I help Everly to sit on the couch before flicking the damn TV off . John , I could hear , was calling out to her , and I looked around for her phone and found it on the floor . Picking it up , he screeches in my ear . " Everly , what's going on ? Do you need me to come over ? " John says , sounding rather panicked . " She is fine . The pack link overwhelmed her , " I tell him , moving into the kitchen .

" What is it you want ? We already know of Nixon's bullshit interview ? " " I rang for the same reason and also to warn her that Nixon has told me if I don't verify this to the media , he was stopping Claire's treatment , " " Fuck ! " I curse under my breath . I fill a glass with water , take it back to Everly , and pass it to her , watching as she sips it . " What happens if she doesn't get the vaccine ? " I ask . " She will eventually turn forsaken , " John says . " I have

another dose , but it will hold it off another month . She needs that vaccine every month . I am sorry , but I have no choice , Valen . " I growl . He gets up there and states Nixon's claims are valid , and it was going to cause a rift between all the packs and the rogues . " Wait ! You have one Vaccine left ?

" I asked . " Yes , so ? " John says . " Give me the Vaccine . I will see if any of our doctors can replicate it and if we can't , then go public as he wants . " 1 " I haven't got the money to fund a science team . Everly has seen my pack's accounts , " John tells me , " I will pay for it , but if you have to go public , you out Nixon , you tell them everything , even if you are involved in any of it , you go public . It will force him to hand the vaccine over to Claire and buy us some more time to prove a case against him , " I tell him , and I see Everly's head turn to look at me as she listened in on the conversation . "

Or better yet , we beat him at his own game , tell them about Claire , paint him as the hero and tell the city he promised to give her the vaccine free of charge . If he backs out and , I know he won't , it would backfire on him , and it gives us time to work out a cure while she receives " I tell John . I could hear John treatment , ' talking to Claire in a calm voice before returning to the discussion . " I get seen going over there . Nixon will know we are talking , " John says , and I look at Everly .

We go over there . Nixon will definitely know , yet one of the rogues might be able to meet John somewhere . " I will send Macey to the service station near your place , give it to her , " I tell him and we discuss details of the time , etcetera . Everly uses my phone to ring her and gives Macey her father's number . Once we hang up , we wait .
